Tukwila Order Picker License

Tukwila Order Picker License - Order preparation operation or also called order picking as it is more commonly known is a method utilized within warehouse operations and comprises staff called order pickers. The order picker's duty is to collect and take articles in particular quantities to accomplish the customer's orders prior to shipment. Order picking is an easy warehousing method. The effectiveness in which this particular task is completed can be directly related to a supply chain's productivity. Therefore, order picking is among the most controlled logistic processes. Order picking falls within the category of the warehouse management system.

There are some certain types of order picking. The main types include: wave picking method, pick to box method, picker to part method or piece picking, zone picking method and sorting systems method.

The pick to box method comprises the order picker filling the box with the stuff from her or his station. The box then moves to other picking locations until the customer order is done. In this particular method, there is no movement of the order picker workers. In the wave picking method, the order pickers move all-around to gather the needed items for numerous orders. The piece picking or picker to part method is similar where the order pickers or picker move in order to gather the stuff needed but for one order only.

There is no movement by the order picker in the sorting systems method. Rather, stuff are brought to the orderpicker by an automatic system like for instance a conveyor system or an automatic storage system. In the zone picking method, each and every order picker is assigned to one specific zone. They are responsible for only realizing order picking within this specified zone.
