Tukwila Forklift Training Courses

Tukwila Forklift Training Courses - When forklift operator safety training is customized for illiteracy, training time is reduced by 50 percent. Forklift training certification, lift-truck operator driver safety training evaluation, and train the trainer programs offer regulation-compliant, thorough training in industrial-powered fork truck safety and operation. Lift truck pedestrian safety is provided also.

Learn with our highly experienced group of professionals to ensure that your staff are as well-trained as possible. Lift truck certification is delivered on site by licensed instructors with many years of practice. People training will learn how to spot dangers and perform safety checks necessary for the efficient and safe utilization of a powered industrial lift truck.

Forklift Training Guidelines
The following checklist is important for whichever workplace that has lift trucks on the premises. Each of these questions must be answered with "yes" if all the safety rules and regulations are being followed. A "no" to whatever question indicates a procedural weakness which may result in injury, damage to machinery or accident.

1) Is the traffic of the pedestrians separate from the operating are of the forklift?
2) Is pedestrian access to travel areas of the forklift restricted by barriers?
3) Are pedestrian walkways provided and well marked?
4) Are "forklift in operation" signs visibly clear?
5) Are mirrors for pedestrians and drivers provided at blind spots?
6) Are changes to daily lift truck schedules communicated to all affected workers?
7) The forklift tires being utilized are suitable for all operating surfaces?
8) Lift truck seatbelt is being used?
9) The seat of the forklift is in good condition?
10) The maintenance schedule of the forklift is being followed?
11) Are annual inspections of the forklift being done?
12) Is the type of forklift right for the tasks?
13) Is there a readable load chart on the forklift?
14) Can the operators read and understand the load chart?
15) The chart lists the safe lifting capacity for all attachments and their uses?
16) Are the warning devices on the forklift working correctly?
17) Is the operating speed control device fitted correctly?
18) The lift truck overhead cage is fitted right?
19) Have all forklift operators acquired certification?
20) Warning signs and speed limits are being observed?
21) Are lift truck operators up to date on training for all types of lift trucks being utilized?
22) Forklift operators understand their duties to report the damage to the equipment and other forklift accidents?
23) Is the pre-test checklist reviewed each day prior to the machinery being used?
